ABSTRACT

Ayurveda, the ancient Indian science of life which has definite object as narrated in Caraka Samhita and Sushruta Samhita. The whole purpose is to achieve healthy and disease free life “Prayojanam Casya Svasthasya Svasthayarkshnanam Aturasya Vikaraprashamanam Ca”. Man, the superior most of all species has always been remaining in a search of One Prime Goal: “The perfect health”. From Vedic to modern era, all the researches have been directed by the eminent scholars to achieve the same. With the purpose of study, historians have grossly divided the period into-Ancient period (4000 B.C. to 6th Cent. A.D.), Medieval period (7th Cent. A. D. to 15th Cent. A. D.) and Modern period (16th Cent. A. D. Onwards). The nighantus, Ayurvedic form of Materia Medica could help significantly in this direction. Numerous nighantus have been written from the very beginning of Ayurvedic period (medieval ) to solve the hidden meanings of cryptic names of medicinal plants. In this work kosa, nighantu and some samhitas are discussed. The present work aims to discuss Arjuna in various aspects in a chronological order.

Keyword: Ayurveda, Arjuna, Nighantu, Kosha, Samhita.

INTRODUCTION

The term Nighantu is based on the term Nigama. The etymology of nigama is, which brings out the extremely concealed or secret meaning of words in systemic way. This tradition was also adopted by the Ayurvedic scholars to simplify the technical words especially in the field of dravyaguna. Earlier nighantus were limited to explain the synonyms only. After some time the description of properties, action and indications are also included in the nighantu along with synonyms. The Nighantu literature is one of the important aspects in the study of Ayurveda and especially in the subject of Dravyaguna Vijnana. The Nighantu literature is also as ancient as Ayurveda. Much importance has not been given to the study of Nighantu. The ancient Nighantus were actually like Kosa, containing the synonyms of dravya. Later on, the drugs were given the description of properties, actions and their uses. In true scene the Nighantu means collection of words, synonyms and the names of the medicinal substances. The Nighantu may be defined as a glossary containing synonymous groups, the names of the drugs, plants, animals, minerals or anything that is administered either as food or medicine to the human body. ‘Arjuna’is explained in almost all the important nighantus and kosha.

MATERIAL & METHOD

Amarakash: (5th Cent. A.D.)
This book is the compilation done by Amar Singh. In this book total subject was divided into 3 parts. First and second parts include 10 chapters each and third part comprises of 5 chapters. The total subject was narrated with synonyms. In Vanausadhitvarga of Amarakosha the writer has given three new synonyms of arjuna viz. nadasarja, virataru and inradu along with kakubha.
Bhuwal Ram, Brijesh Kumar, Sarvesh Kumar Bharati*/

Saurstra nighantu: (6-7th Cent. A.D.)
Arjuna has been described in Salsaradi gana. Three new synonyms mentioned ie. kirita, madhugerikapushpa and phaalguna.2

Siddha Sara nighantu: (6th Cent. A.D.)
Arjuna has been described in Saladi gana and Nyagrodhadi gana. Where the synonym partha has been mentioned.3

Ashantaga nighantu: (8th Cent. A.D)
In this nighantu, Acharya Vahata has described maximum group of drugs on the basis of classification of Ashtanga Sangraha and Astanga Hridaya. DISCUSSION
The drug Arjuna has been widely and frequently described in Kosha and Nighantus. Mainly the properties and synonyms of Arjuna have been described. Most of the nighantus mentioned the synonyms of Arjuna as Kakubha, Dhananjaya, Partha, Nadisarja, Virtaru, Indradru, Svetsvaha, Madhugandhipushpa, Phalguni, Dhanvi, Nadaj, Chitrayodi, Viraantaka, Pandav, Rathradruma, Indrataru, Maturekasuta, Gandiv, Krishnasarthi etc. and properties as Ruksha, Laghu Guna, Kashya Rasa, Katu Vipaka, Shita virya, Kaptha Pitta shaman and used of Arjuna in different diseases viz. Hridaya roga, Kshata kshaya, Vrana sodhana, Bhagna, Medo roga, Meha roga etc. has been mentioned. The botanical source of the arjuna was identified by Wight and Arnott in 1843, and Species name was given on the basis of classical name-arjuna, thus the name Terminalia arjuna (Roxb.) W. and A. came into existence.

CONCLUSION
History of drug can be studied under Vedic, Upanishad, Purana, Samhita, Nighantu and Adhunika kala. This review on Arjuna in different nighantus and kosha can be useful to know about the different synonyms and properties and useful parts of Arjuna. While the usefull part of Arjuna is tvaka mainly used. Most of the Nighantus have mentioned its use in Hridaya roga, Kshatakshaya, Vrana, Bhagna, Medo and Meharoga.
